## RAPS' Extract Seasonings Stand out in the Crowd

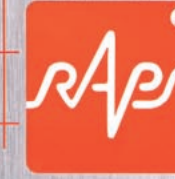

- 1 Reliable  
Product Features**
- 2 Shorter  
Production Processes**
- 3 Natural  
Seasoning Features**
- 4 Low Bacteria Count**
- 5 Lower  
Production Costs**
- 6 Adaptability to Your  
Requirements**
- 7 Advantages of  
High Pressure Technology**
- 8 Environment-friendly  
Extraction**

Industry Service

RAPS' Extracts: Take Advantage of our Knowledge

**Concentrate**  
on the Essential Part!

## 1 Reliable Product Features

RAPS' Extract Seasonings are highly concentrated and standardized. This means every delivery provides the same seasoning power

- This ensures reliable and consistent flavour features in your products

## 2 Shorter Production Processes

Natural spices only release their flavour slowly. RAPS' Extract Seasonings disperse quickly and dissolve completely

- This provides measurable time-savings during production
- No seasoning lumps
- No spoiling or dulling by residues

## 3 Natural Seasoning Features

- There is no difference between the flavour of RAPS' Extract Seasonings and the natural spice
- Pure flavour - natural and full-bodied

# RAPS' Extract Seasonings: Concentrating on Your Interests

## 4 Low Bacteria Count

RAPS' Extract Seasonings have a low bacteria count:

- This ensures more product safety

## 5 Lower Production Costs

CO<sub>2</sub> Supercritical Extraction increases the output of the seasoning elements

- Low usage rate
- High concentration, save storage space and transportation costs

## 6 Adaptability to Suit Your Requirements

RAPS' Extract Seasonings are available in liquid, emulsified or powder form products on a salt or dextrose carrier (other carriers such as maltodextrin etc, are available on request)

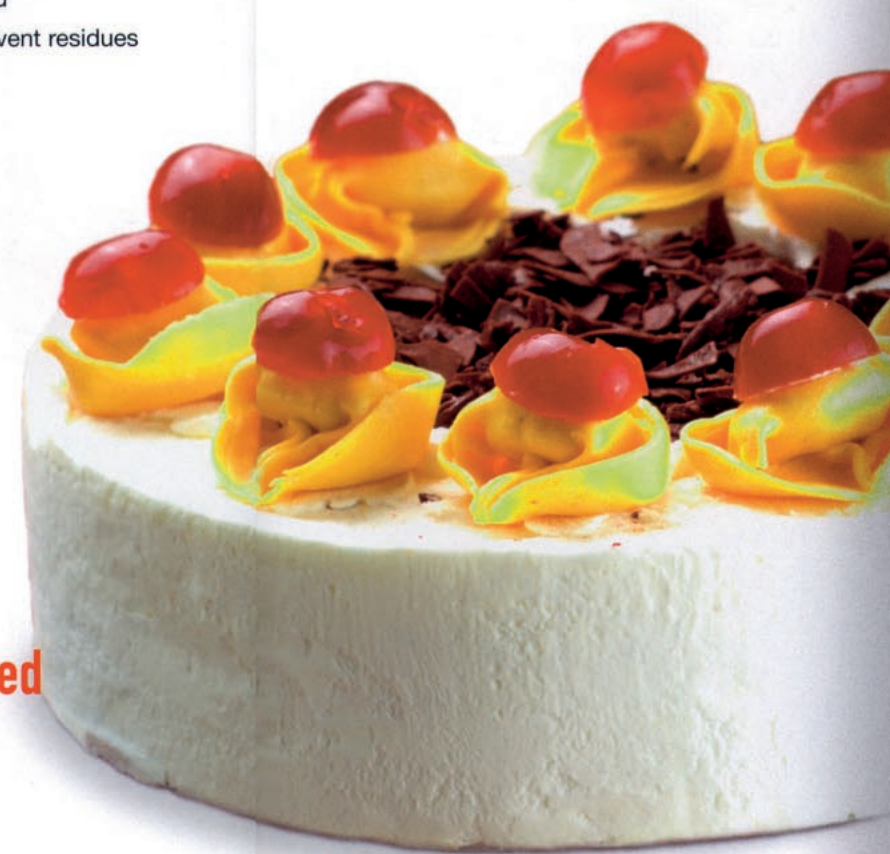

- Available as single spice (multiple concentration)
- Or ready-to-use blend (double concentration) according to your individual product recipe

## 7 Advantages of High Pressure Technology

RAPS' High Pressure Extraction (Supercritical Extraction) releases the precious flavour components from the raw material using high pressure supported by carbonic acid. This method provides extracts with a natural but perfectly standardized flavour, and completely free from solvent residues

## 8 Environment-friendly Extraction

- Gentle production at low temperatures and maximum hygiene standard
- No solvent residues
- Environment protection right from the start

**All extracts  
can be supplied  
from stock**

## Extract Variety from A to Z

|                                     |  |
|-------------------------------------|--|
| Allspice Extract <sup>1</sup>       | Juniper Berry Tincture                             |
